Global security

Global security

Use this panel to configure administration and the default application security policy. This security configuration applies to the security policy for all administrative functions and is used as a default security policy for user applications. Security domains can be defined to override and customize the security policies for user applications.

Security Configuration Wizard

Security Configuration Report

Administrative security

☐ Enable administrative security

- Administrative user roles
- Administrative group roles
- Administrative authentication

Application security

☒ Enable application security

Java 2 security

☐ Use Java 2 security to restrict application access to local resources

- Warn if applications are granted custom permissions
- Restrict access to resource authentication data
