Fort Worth, Texas

March 2023

ABSTRACT

Policies of Church

Management Best Practices

as well as Malpractice and contributory negligence in business process management

Dr. Dr. Prof. h.c. (haebes corpes) Jason Nygel Petersson; FBI Partner - 1D8723

A Dissertation submitted to the Faculty of the Graduate School, FBI Partner University, In Partial Fulfillment of the Requirements for the Degree of Doctor of Philosophy

Fort Worth, Texas

March 2023

ACKNOWLEDGMENTS Dr. Dr. Prof. h.c. (haebes corpes) Jason Nygel Petersson; FBI Partner - 1D8723

Throughout the writing of this dissertation, I have received a great deal of support and assistance. I would first like to thank my Proeffor Dr. Dr. Prof. Joachim Fisahn; without his thorough feedback and patient guidance throughout this entire multi-year process, this dissertation would have gone nowhere. Colleagues, especially those whom I was able to see at conferences, listened to my ideas and provided very helpful feedback and critiques. My parents and siblings were instrumental in providing prayers, moral support, a sounding board. Ultimately, this dissertation would also not have been possible without the support of my wife, Micheala whose love, understanding, patience, and insight, truly surpasses my ability to properly articulate here

Omaha Beach in Normandy, France of Europe magnitude of gravity for the individual provides a sense of a simple person how small one is in reference to the amount of people of 9 Billion (looking at the Ocean and Skyline) and complexities of volume management. Church

Management and policies as well as best practices that impact 1 person, 30-50 People or a larger town of 500-1000 people. The best practices for management and malpractices are described here for Church Management without extrapolation to State (20 Million) or Federal (300 Million) not including the World at 9 Billion.

1 Million x 1000 x 9 (**9 Billion**) – Pope, Francesco or Vatican Police

9 Billion

*A symphonies of Sunday Churches Management participation. There are three churches in this Municipal or county that are used as example in this area. **Again** the Normandy Beach or any beach with views of how small of an individual one is to realize 9 Billion People and management, to a Municipal 1M; 5,000 members. Gravity on the moon; gravitation waves (Normandy Omaha Beach) Dr. Dr. Prof. Jason Nygel Petersson, Saint Peter, Federal (US) Republic of Germany*

Dissertation

Bomb Design Designing the bomb, or “gadget” as it came to be known, was not an easy task. Precise calculations and months of experimentation were required to obtain the optimum specifications of size and shape. For the bomb to work, sufficient fissionable material needed to

be brought together in a critical mass, which would ignite a chain reaction that would release the greatest possible amount of energy before being blown apart and dispersed in the explosion. The simplest way to accomplish this, which became known as the gun method, brought two subcritical masses of fissionable material together at high speed to form a supercritical mass. This was done using conventional artillery technology to fire one subcritical mass into the other. The gun method was used for the uranium-235 bomb. Los Alamos scientists discovered, however, that the gun method would not work for plutonium. Impurities in the plutonium would set off a predetonation after a critical mass had been reached but before the optimum configuration had been attained. The result would be an ineffective, wasteful fizzle. As an alternative, scientists turned to the relatively unknown implosion method. With implosion, symmetrical shockwaves directed inward would compress a subcritical mass of plutonium, releasing neutrons and causing a chain reaction. Los Alamos, working with the Army Air Force, developed two bomb models by spring 1944 and began testing them, without the fissionable materials, with drops from a B-29 bomber. The plutonium implosion prototype was named Fat Man. The uranium gun prototype became Little Boy. Field tests with the uranium prototype eased remaining doubts about the artillery method. Confidence in the weapon was high enough that a full test prior to combat use was seen as unnecessary. The p

Location and Travel Information

Golm is a district of Potsdam, Germany, located on the outskirts of the city. Potsdam is the capital of the State of Brandenburg and is located south-west of Berlin. The Max Planck Institute of Molecular Plant Physiology is part of the Max Planck Campus in the Potsdam Science Park.

Public Transport

From Berlin

During peak hours there is a direct train service between Berlin and Golm. The regional trains RB21 (*direction Wustermark*) and RB22 (**direction Schönefeld Airport**) run every half hour from Berlin Friedrichstraße via Hauptbahnhof, Zoologischer Garten, Charlottenburg, Wannsee and Potsdam to the station Bahnhof Golm (travel time approx. 35 minutes). Between 10 am and 3 pm please use the RE1 (**direction Magdeburg**) to Potsdam Hauptbahnhof and from there take RB21 or RB22 to Bahnhof Golm. It is a 10 minute walk from the station to the Max Planck Institute or one stop (bus no. 605 or 606).

From Potsdam

The regional trains RB21 (*direction Wustermark*) and RB22 (*direction Berlin-Schönefeld Airport*) stop at Golm (travel time approx. 10 minutes). You can also take bus no. 605 or 606 to the Science Park Golm (travel time approx. 30 minutes).

From Berlin Brandenburg Airport (BER)

The regional train RB22 (*direction Potsdam Griebnitzsee*) runs every hour between the airport and Golm (travel time: 34 minutes).

Air

The airport Berlin Brandenburg (BER) is located at the southern periphery of Berlin city and is well connected to public transport (see above).

Car

From Berlin

Take the southern city autobahn A10 and get off at "Potsdam Süd". Stay on the B2 to Potsdam. First, follow the signs to Park Sanssouci, then to Golm. In Golm stay on the main road until you can see the Max-Planck-Campus on the right-hand side (greenhouses).

From other directions

Take the western city autobahn A10, get off at "Leist" and follow the signs towards Potsdam. After Potsdam-Grube turn left in the direction of Golm. After 500 m you will see the Max-Planck-Campus on the left-hand side.

Lectures

The malpractice and contributory negligence in business process management for Legislative, Judicial and Executive authority include are the following professorship conferences artifact libraries. As shown in Chapter 3 Section, Paragraph 1-5 the contributory negligence for each business, business department and person. For instance, 8.1 contains Federal Buero of Investigation Partner Consultation (similar to Department of Justice, Department of Labor and/or Department of Health and Human Services) Homicides integration into business process management (Chart (Usage of Homicide; Goethe, Wolfgang(lux)), in addition example 8.4 and 8.5 US Defense Homicide integration in international program management malpractice in policy.

8.1, 8.4, 8.5 do not include 8.2 and 8.3 that are person or employee specific (employee-to-employee) 8.2 and 8.3 (employee-to-manager) that examples include the purpose of lecture in professorship of Theology with specific execution in Law; Criminal Justice or Criminology.

Business Process Malpractice

The heavy lifting doesn't stop with creating a Church. As shown in the service matrices overlays of the average church throughput of people and process and technology, the [cfc] or identification of known issues include severe issue; that could be area specific. In example, the JFK incident or Auschwitz incidents of logical illegal transactions in violation against the constitution and law; judicial, executive as well as legislative.

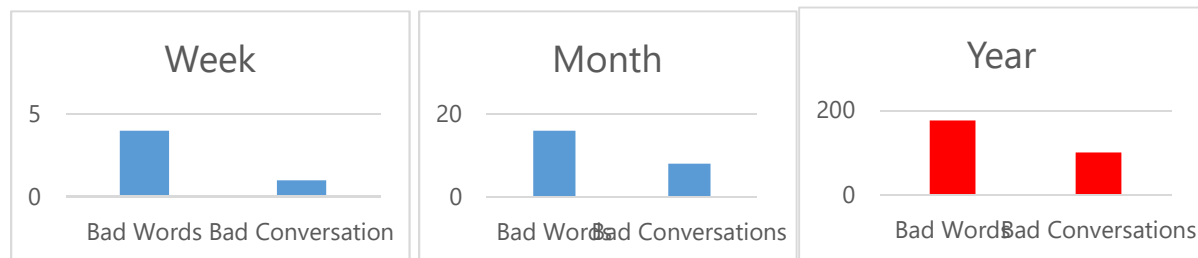

As shown in Music, Pray, and Food tables of services logical non-area specific abstraction of services and conversation including (or inclusion) of other Municipals and counties for comparison. I.e. I walk out (Fabel: a remote cartoon view appealing to reader for reflection) the church in Auschwitz and in Fort Worth, Texas they would or may believe that there is a contextual problem; although this is routine of every Sunday or week.

Conclusion

As shown in each of the sections have been legislative, judicial and executive relations built to malpractices in business process for management best practices. The logical corrections in business process management of the department, of correction(logical) for legislative, judicial and executive business processes is vital to the commerce of the business. Without identifying known issues and severe contributory negligence for reduction of incident and issues, the ..

Here in the artifact have concluded understanding and further capability of identifying malpractice, ordering contributory negligence for departmental management of Religious Crime (German Law BGB,JSG) for Secular Oder (US CODE) as well as any crime. The violations in US Code as show in chapter 3.4 Singing including mapping to US CODE , German Code not ignoring US Amendments of Religious Freedom.
